DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-9 and 11-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "A locking device for a screw coupling, said screw coupling comprising first and second components rotatable in relation to one another during screwing and unscrewing...the locking device being mounted on the second component...a stop component connected for common rotation with a body carried by the second component, the body connected for common rotation with the second component...wherein the disconnectable coupling means comprises a ratchet allowing relative rotation in the direction of unscrewing when a torque at least indirectly applied to the coupling component and the stop component with respect to one another overcomes a predetermined elastic resistance, the torque between the coupling component and the stop component resulting from a torque applied between the first component and the body".

It is not clear how Applicant is only positively reciting a locking device *for a screw coupling* when the structural limitations for the locking device of claim 1 are dependent on the first and second components of the screw coupling. For example, the structural limitations of "the locking device being mounted on the second component" and "a stop component connected

for common rotation with a body carried by the second component" clearly show the connection of the structural elements of the locking device to the structural elements of the screw coupling. It appears that Applicant is actually claiming the combination of a locking device including the screw coupling. If this is Applicant's understanding, claim 1 needs to be amended to reflect this understanding.

Response to Arguments

3. Applicant's arguments with respect to claims 1-9 and 11-15 have been considered but are moot in view of the new ground(s) of rejection.
